Product name: SOLID STATE RELAY

Model No.: S202T01

(Business dealing name: S202T01F)

1. These specification sheets include materials protected under copyright of Sharp Corporation ("Sharp"). Please do not reproduce or cause anyone to reproduce them without Sharp's consent.

2. When using this product, please observe the absolute maximum ratings and the instructions for use outlined in these specification sheets, as well as the precautions mentioned below. Sharp assumes no responsibility for any damage resulting from use of the product which does not comply with the absolute maximum ratings and the instructions included in these specification sheets, and the precautions mentioned below.

(Precautions)

(1) This product is designed for use in the following application areas;

• OA equipment • Audio visual equipment • Home appliances

· Telecommunication equipment (Terminal) · Measuring equipment

· Tooling machines · Computers

If the use of the product in the above application areas is for equipment listed in paragraphs (2) or (3), please be sure to observe the precautions given in those respective paragraphs.

(2) Appropriate measures, such as fail-safe design and redundant design considering the safety design of the overall system and equipment, should be taken to ensure reliability and safety when this product is used for equipment which demands high reliability and safety in function and precision, such as;

Transportation control and safety equipment (aircraft, train, automobile etc.)

• Traffic signals Gas leakage sensor breakers Rescue and security equipment

· Other safety equipment

(3) Please do not use this product for equipment which require extremely high reliability and safety in function and precision, such as;

Space equipment Telecommunication equipment (for trunk lines)

· Nuclear power control equipment · Medical equipment

(4) Please contact and consult with a Sharp sales representative if there are any questions regarding interpretation of the above three paragraphs.

3. Please contact and consult with a Sharp sales representative for any questions about this product.

S202T01F

1. Application

This specification applies to the outline and characteristics of SIP type Solid State Relay (SSR), Model No. S202T01 (Apply line voltage 200V to 265V AC).

2. Outline Refer to the attached sheet, page 4.

3. Ratings and characteristics Refer to the attached sheet, page 5-6.

4. Reliability Refer to the attached sheet, page 7.

5. Outgoing inspection Refer to the attached sheet, page 8.

- 6. Supplement
 - 6.1 The business dealing name used for this product when ordered or delivered shall be S202T01F.
 - 6.2 This product is not designed against irradiation.

This product is assembled with electrical input and output.

This product incorporates non-coherent light emitting diode.

- 6.3 ODS materials
 - ① This product shall not contain the following materials.
 - ② Also, the following materials shall not be used in the production process for this product.

 Materials for ODS: CFC_s, Halon, Carbon tetrachloride,1.1.1-Trichloroethane (Methylchloroform)
- 6.4 Specific brominated flame retardants such as the PBBO and PBBs are not used in this device at all.
- 6.5 Package specification Refer to the attached sheet, page 8-9

6.6 This Model is approved by UL and CSA

UL File No. : E94758

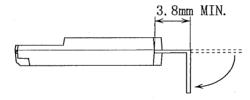

CSA File No.: LR63705

7. Notes

- 7.1 Circuit design
- (1) The LED used in the Solid State Relay generally decreases the light emission power by operation. In case of long operation time, please decide I_F value as 2 times or more of the Maximum value of the Minimum triggering current at circuit design with considering the decreases of the light emission power of the LED. (50%/5years)
- (2) Input current (I_F) at off-state shall be set 0.1mA or less.
- (3) In case that pulse drive is carried out, the pulse width of input signal shall be set 1ms or more.
- (4) Please make sure that surge absorption circuit and dv/dt control circuit are provided for protection of S216SE2F. In general, we recommend that both CR circuit and varistor be used in conjunction.
 Watch for faulty operation that may be caused by leakage current that runs through the CR circuit.
- (5) Some have a built-in rectifier such as diode, etc. as part of the electromagnetic counter or solenoid specified for use on AC. If this is the face, check out properly the wave form of the load current.
 If it is a rectangular wave as it may become, the SSR will not turn OFF.

- 7.2 Fixing of heat sink
- Current value of the load shall be held within the range of derating curve.
 Install an optional heat sink as required.
- (2) By using optional heat sink, if it is necessary to take isolation voltage between S216SE2F and optional heat sink. Please use insulation sheet.
- (3) Optional heat sink shall be installed by screws-fastening torque 0.3 to 0.5N m.
 And, please conform to the below items in order to be sunk heat effectively to generating heat in this device.
 - ①It shall be no unevenness on contacting surface among heat sink, insulation sheet and device.
 - (2) It shall be no burr and metal chip etc. on contacting surface among heat sink, insulation sheet and device.
 - (3) It shall be spread equally silicone grease on contacting surface among heat sink, insulation sheet and device. Silicone grease shall be used such as:
 - (1)No secular variation in operating temperature range.
 - 2)Base oil does not separate and it does not stay in the device.
 - ③If base oil permeate into the inside of the device, it does not effect any degradation, for example, due to the expansion of the coating material for chip. For example, we recommend G-746; Shin-Etsu Chemical Co., Ltd. And SC-102; Dow Coming Toray Silicone Co., Ltd.
- (4) If it is necessary to employ screws with installation of optional heat sink, please solder after fixing screws.
- 7.3 If it is necessary to bend terminal pins, please bend them 3.8mm or more away from base of terminal pins to prevent mechanical stress between base of terminal pins and resin of mold.

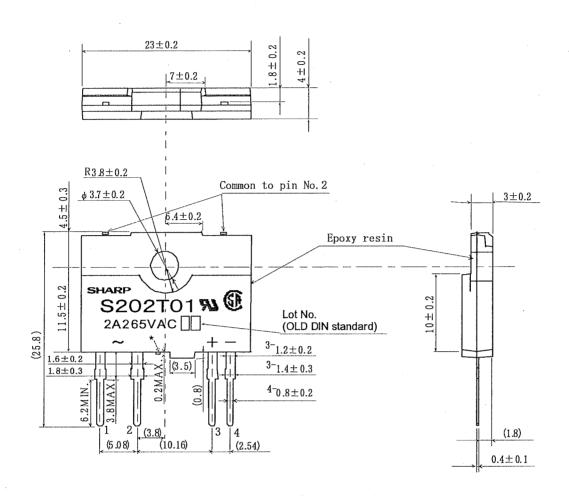

- 7.4 Cleaning
- (1) Solvent cleaning: Solvent temperature 45°C or less, Immersion for 3 min or less
- (2) Ultrasonic cleaning: The effect to device by ultrasonic cleaning differs by cleaning bath size, ultrasonic power output, cleaning time, PCB size or device mounting condition etc. Please test it in actual using condition and confirm that doesn't occur any defect before starting the ultrasonic cleaning.
- (3) Applicable solvent: Ethyl alcohol, Methyl alcohol, Isopropyl alcohol In case when the other solvent is used, there are cases that the packaging resinis eroded. Please use the other solvent after thorough confirmation is performed in actualusing condition.
- 7.5 Precautions for Soldering
- (1) In case of flow soldering (Avoid immersing the resin part in the solder.)

 It is recommended that flow soldering should be carried out within 260°C and within 10s

 (Pre-heating:100 to 150°C,30 to 80s): Within 1 times
- (2) Other precautions Depend on equipment and soldering conditions (temperature, Using solder etc.), the effect to junction between PCB and lead pins of photocoupler is different. Please confirm that there is no problem on the actual use conditions

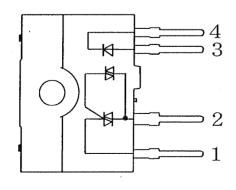

Productmass: Approx. 6.3g

Pin finish: SnCu plating (Cu: TYP. 2%)

	UNIT : 1/1mm
Name	S202T01 Outline Dimensions (Business dealing name : S202T01F)

3.1Absolute maximum ratings

Ta=25°C

Parameter		Symbol	Rating	Unit	Conditions
Tt	Forward current	I_{F}	50	mA	-
Input	Reverse voltage	V_R	6	V	
	RMS on-state current	I _T (rms)	2	Α	Refer to the Fig.1
	Peak one cycle surge current	Isurge	20	Α	60Hz sine wave, Tj=25°Cstart
Outmut	Repetitive peak off-state voltage	V_{DRM}	600	V	-
Output	Non-repetitive peak off-state voltage	V_{DSM}	600	V	-
	Critical rate of rise of on-state current	dI _T /dt	40	A/μs	-
٠٩	Operating frequency	f	45 to 65	Hz	-
	Operating temperature		-25 to +100	°C	
Storage temperature		Tstg	-30 to +125	$^{\circ}\mathbb{C}$	-
	Isolation voltage (*1) Soldering temperature		3.0	kV	AC 60Hz, for 1min 40 to 60%RH
			260	$^{\circ}$	For 10 s

^(*1) Isolation voltage measuring method

- (1) Dielectric withstand tester, with zero-cross circuit shall be used.
- (2) The wave form of applied voltage shall be sine wave.
- (3) It shall be applied voltage between input and output. (Inputs and outputs shall be short-circuited respectively)

3.2 Electrical characteristics

Ta=25°C

	Parameter	Symbol	MIN.	TYP.	MAX.	Unit	Conditions	
Input	Forward voltage	V _F	_	1.2	1.4	V	I _F =20mA	
при	Reverse current		-	-	10 ⁻⁴	A	V _R =3V	
	Repetitive peak off-state current	I _{DRM}	-	-	10 ⁻⁴	A	V _D =V _{DRM}	
	On-state voltage	V _T (rms)	-	-	1.7	V	I _T (rms)=2.0A, R load, I _F =20mA	
Output	Holding current	I_{H}	_	-	25	mA	-	
Output	Critical rate of rise of off-state voltage dV/dt 30 -		V/μs	V _D =2/3V _{DRM}				
	Commutation critical rate of rise of off-state voltage	(dV/dt)c	4	-	-	V/μs	Tj=125°C, V_D =2/3 V_{DRM} di _T /dt=-1.0A/ms	
т с	Minimum trigger current	I_{FT}	-	-	8	mA.	$V_D=12V$, $R_L=30 \Omega$	
Transfer charac-	Isolation resistance	R _{ISO}	10 ¹⁰	_	-	Ω	DC500V, 40 to 60%RH	
teristics	Turn on time	t _{ON}	••	-	1	ms	V _D (rms)=200V, AC50Hz,	
urisues	Tum off time	t _{OFF}	-	-	10	ms	I_T (rms)=2.0A, R load, I_F =20mA	

3.3 Recommended operating conditions

Parameter Symbol Recommended oper conditions		Recommended operating conditions	Unit	Conditions	
Teresyst	Input signal current at on	I _F (on)	16 to 24	mA	-
Input Input signal current at off		I _F (off)	0 to 0.1	mA	
Output	Load supply voltage	V _{OUI} (rms)	80 to 240	V	-
Output	Load supply current	I _{OUT} (rms)	0.1 to 2.0	A	Refer to the Fig.1 (Ta<40°C)

(Fig. 1) RMS on-state current derating curve

4. Reliability

The reliability of products shall satisfy items listed below.

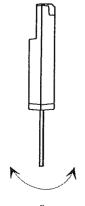

Confidence level: 90%

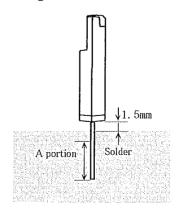

LTPD: 10 or 20

		·	11 10 . 10 01 20
Test Items Test Conditions		Failure Judgement	Samples (n)
TOST IUIIIS	Test Conditions	Criteria	Defective (C)
Temperature cycling	-30°C(30min)~+125°C(30min) 20cycles test		n=22, C=0
High temp. and high humidity storage	+60℃, 90%RH, 500h		n=22, C=0
High temp. storage	+125°C, 1000h		n=22, C=0
Low temp. storage	-30°C, 1000h		n=22, C=0
Intermittence operation	AC200V, I_T (rms)=2.0A, I_F =20mA 1min ON, 1min OFF Ta=25 \pm 3°C, 500h	(1) V_F >U×1.2 (2) I_R >U×2.0	n=22, C=0
Vibration	200m/s ² , 100 to 2000Hz/ 4min 4 times/ X, Y, Z direction	(3) $I_{DRM} > U \times 2.0$ (4) $V_{T} > U \times 1.2$	n=11, C=0
Terminal strength (Bending)	The first bending test is to put back into the original shape after the terminal bent 90° by a 5N load. The second bending test is to do the same but opposite direction. These two tests shall be performed. *1	(5) I _{FT} >U×1.2	n=11, C=0
Terminal strength (Tension)	Weight: 10N, 30s/ terminal direction		n=11, C=0
Soldering heat	260°C,10 s Up to 1.5mm from resin portion *2		n=11, C=0
Solderability	245±3°C, 5s *2 solder:Sn/3.0Ag/0.5Cu flux:EC19S (TAMURA KAKEN CORPORATION)	Soldering area ≤ 95% of A portion	n=11, C=0

U: Max. specification values

*2 Soldering area is shown below.

A portion: From the lower edge of tiber cut portion

Ü

^{*1} Terminal bending direction is shown below.

5. Outgoing inspection

5. 1 Inspection items

(1) Electrical characteristics

(2) Appearance

5. 2 Sampling method and Inspection level

A single sampling plan, normal inspection level II based on ISO 2859 is applied.

Defect	Inspection item	AQL (%)
Major defect	Electrical characteristics Unreadable marking	0. 10
Major defect	Appearance defect except the above mentioned.	0.40

6.5 Package specification

6.5.1 Package materials

No.	Name	Materials	Purposes
1	Sleeve	HIPS	Products packaged
2	Stopper	Olefine-Elastomer	Products fixed
3	Packing case	Corrugated cardboard	Sleeve packaged
4	Kraft tape	Paper	Lid of packing case fixed
5	Label	Paper	Model No., (Business dealing name), quantity and inspection date specified.

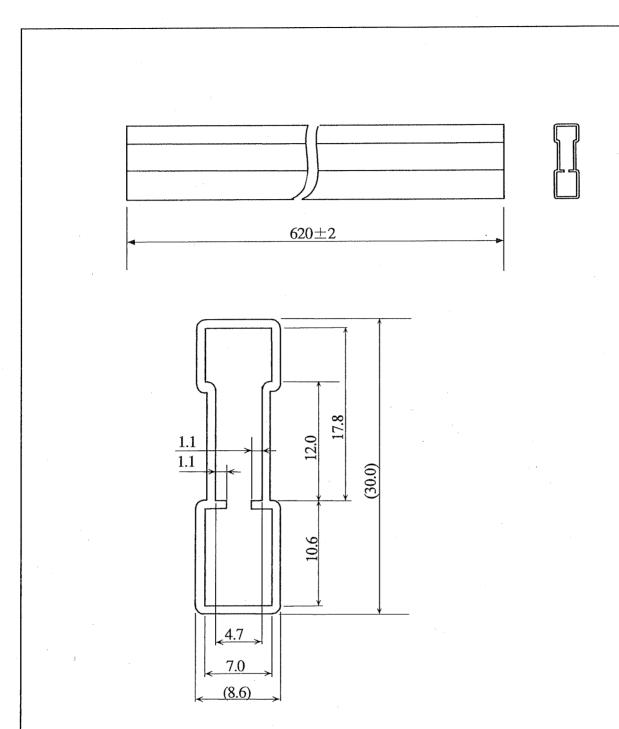

6.5.2 Package method

- (1) MAX. 25pcs. of products shall be packaged in a sleeve and both of sleeve edges shall be fixed by stoppers.
- (2) MAX. 20 sleeves above shall be packaged in a packing case.
- (3) The label shall be put on the side of the packaging case.
- (4) Case shall be closed with the lid and enclosed with kraft tape.

6.5.3 Package outline dimensions

- (1) Sleeve outline dimensions Refer to the attached sheet, Page 9.
- (2) Packing case outline dimensions Refer to the attached sheet, Page 10.

Note 1) Thickness: 0.8 ± 0.2

2) Unless otherwise specified tolerances shall be ± 0.5 mm. (However except for deformation due to the stopper in sleeve.)

3) (): TYP.

Unit: 1= 1/1mm

Name Sleeve outline dimensions
